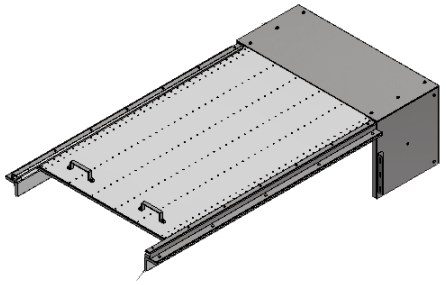
DYNATECT®
DYNAMIC EQUIPMENT PROTECTION

PROTECTIVE COVERS

CUSTOM ROLL-UP TANK COVERS

Roll-up tank covers are ideal for covering large tanks and can be equipped with a motor drive featuring full electric control for forward, reverse and stop functions. Dynatect will produce a complete system in any width or length you require. A scroll-type take-up mechanism is also available. Shades are constructed of continuous stainless steel top surface with aluminum or stainless steel support ribs for large tanks. When environmental conditions prohibit the use of steel, thermoplastic designs are available.



Applications:

- Chemical, degreasing, plating, and painting tanks
- Containment of hazardous fumes
- Control evaporative emissions
- Prevent contamination in tank
- Protect personnel

QUOTE REQUEST **(Please include your company name and address along with your contact information)**

Please send a sketch, drawing, or model of your application along with a description of the type, purpose, and contents of the tank. Please let us know if the application requires dual (opposing) covers at each end, or a single cover mounted to one end. Please also specify the preferred drive method. When providing inner and outer tank dimensions, please note the largest unsupported span and tank depth.
