GORTITE® DOOR PADDLE HANDLE

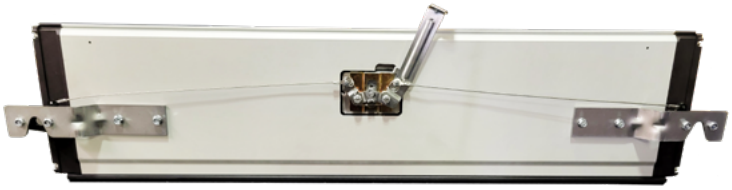
Elevate Your Vehicle's Functionality and Style

Dynatect's Gortite Door Paddle Handle accomplishes a sleek design with an integrated key lock for applications that value flush aesthetics, compartment security, combined with these other benefits:

- **Central Mounting:** Mounted in center of door on a ~6" tall extrusion with a convenient finger rail positioned at the standard middle
- **License Plate Mounting Option**: An additional option includes an 8" extrusion with a finger rail located at the bottom, ideal for efficiently mounting a license plate
- **Standard Inside Release Handle**: Comes standard with an inside release handle, making it a prime choice for delivery vehicles, providing easy exit capabilities from the inside
- **Protected Mechanism**: The inside assembly is shielded by a durable metal cover, protecting the mechanism from incidental contact
- **Premium Material & Finish**: The paddle handle is made from stainless steel with a polished finish, complemented by an integral keyed lock
- **Optional Features**: Can be ordered without keyed lock or without inside release handle

Dynatect's Gortite Door Paddle is available on any standard Gortite aluminum roll-up door beginning April 2024.

Front View - On optional 8" extrusion with bottom-mount finger rail. Paddle handle centered on door.



Rear View: Shown with cables connecting to latches. Shown mounted on optional 8" extrusion. Shown with standard inside release handle (handle design may vary depending on application)

The inside assembly features a metal cover which protects the mechanism from incidental contact. Shown mounted on optional 8" extrusion
