

## GORTITE® DOOR PADDLE HANDLE

Elevate Your Vehicle's Functionality and Style

Dynatect's Gortite Door Paddle Handle accomplishes a sleek design with an integrated key lock for applications that value flush aesthetics, compartment security, combined with these other benefits:

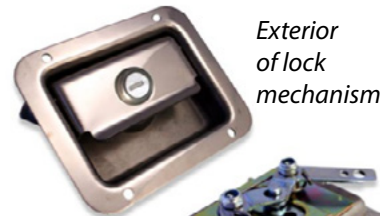

- **Central Mounting:** Paddle handle mounted in center of door on a 5" tall extrusion with a convenient finger rail optimally positioned for ease of opening
- **Standard Inside Release Handle:** Comes standard with an inside release handle, making it a prime choice for delivery vehicles, providing easy exit capabilities from the inside
- **Protected Mechanism:** The inside assembly is shielded by a durable metal cover, protecting the mechanism from incidental contact
- **Premium Material & Finish:** The paddle handle is made from stainless steel with a polished finish, complemented by an integral keyed lock
- **Optional Features:** Can be ordered without keyed lock or without inside release handle
- **License Plate Mounting Option:** An additional option includes an 8" extrusion with a finger rail located at the bottom, ideal for efficiently mounting a license plate

*Exterior View - On standard 5" extrusion with bottom-mount finger rail. Paddle handle centered on door.*

*Interior View: The inside assembly features a metal cover which protects the inside release handle mechanism from incidental contact. Shown mounted on our standard 5" extrusion.*
